

designed, engineered and fitted...without compromise

b-type platform lift

stylish and reliable solution

a simple screw and nut driven lifting platform for mainly external applications. The B-Type can also be installed internally, travelling a maximum of 2m. With its open design covered by toughened and laminated glazed panels, it provides a stylish and reliable platform lift solution.

no pit required

the B-type platform lift doesn't require a pit as the platform lift comes with an internal ramp.

operation

"Saloon" type doors allow easy access to the platform. Control buttons are easy to handle for the operator with hold-to-run operation

safety first

safety is of the utmost importance for the open type platform lift. A safety plate covers the whole underside of the platform, if the plate is touched the lift stops immediately.

technical data

Rated load	300kg
